

Knowledge Bank — SpeakX (Dummy)

Company Vision & Mission

Vision: Enable every non-native English speaker to communicate confidently in real-world contexts.

Mission: Deliver daily AI-guided speaking practice that builds habit, confidence, and measurable communication improvement.

North Star Metric

Monthly Confident Conversations (MCC)

Number of users who complete ≥ 12 meaningful AI speaking sessions per month with measurable fluency improvement.

Supporting proxies

- Weekly active speaking users
 - Session completion rate
 - Confidence score improvement
 - Trial → Paid conversion
-

Target Audience Profiles

1. Working Professionals

- Goal: Career growth, meetings, presentations
- Pain: Fear of speaking, lack of practice time

- Trigger: Job opportunity pressure

2. College Students

- Goal: Placements, interviews
- Pain: Vocabulary gap, hesitation
- Trigger: Placement season

3. Homemakers / Career Returners

- Goal: Confidence, social communication
 - Pain: Low exposure, fear of judgment
 - Trigger: Personal growth motivation
-

Product Features

 - Over-notification pressure
-

User Journey Stages

Trial (D0–7)

Goal: First habit loop

- Guided onboarding
- Easy wins
- Streak creation

Primary metric: First 3 sessions

Paid (D8–30)

Goal: Value realization

- Skill feedback depth
- Progress visibility
- Personalization

Primary metric: MCC trajectory

Retention (D31+)

Goal: Identity formation

- Advanced scenarios
- Social proof
- Long streak reinforcement

Primary metric: Monthly speaking consistency

Churned / Inactive

Goal: Re-activation

- Confidence reminder
- Reduced friction return
- Highlight missed streak

Octolysis Hook Mapping

Core Drive	Feature Hook
Epic Meaning	Become confident speaker identity
Accomplishment	Streaks, XP, levels
Empowerment	Practice → feedback loop
Ownership	Progress dashboard
Social Influence	Leaderboards, share wins
Scarcity	Limited trial days
Unpredictability	New daily scenarios
Loss Avoidance	Streak reminders

Feature → Goal Mapping Summary

- AI conversations → Skill → North Star
- Gamification → Habit → Retention
- AI Companion → Personalization → Engagement
- Pricing → Conversion → Revenue

Key Behavioral Assumptions

- Daily micro-practice beats long sessions
 - Confidence grows through repetition
 - Positive reinforcement increases retention
 - Identity > motivation for long-term engagement
-

Constraints

- Respect user emotional safety
- Avoid notification fatigue
- Personalization must remain explainable
- Metrics must map back to MCC
